**Appendix:** Applicable documents

The certification is based on

- the „Attestation of conformity of drinking water hygienic suitability – simplified procedure“ of the certification body HyCert im Hygiene-Institut des Ruhrgebiets in the version of 08-09-2021,
- the Recommendation for Attestation of Conformity of product hygiene suitability for drinking water of the German Environment Agency (UBA) of 07-29-2021,

as well as on the following information provided by the certificate holder

- product information,
- test documents and
- formulation data.

We confirm that all above listed products meet the requirements of the

- **Evaluation criteria for plastics and other organic Materials in contact with drinking water**

in the temperature area 23 °C and 85 °C for the product group

- **Fittings for pipes with ID < 80 mm**

and comply with them.

# PRÜFZEUGNIS

# Heizmann

This confirmation is generally valid for end products of risk group P2 or P3 according to the KTW evaluation criteria provided that the processing conditions are observed by the user.

For end products of risk group P1 (except for the product group pipes DN < 80mm), this confirmation is valid to prove the conformity of the requirements regarding formulation and microbiology. Migration tests must be carried out on the end product.

This certificate is valid beginning with the date of issue and is ending by 30.06.2027.

In case of translations, the date of issue of the original shall apply.

The materials and components listed in the appendix "Applicable documents" belonging to this document are the basis of this certificate.

In case of changes of formulations or manufacturing conditions, the document loses its validity. The annex contains confidential information on the underlying test documents and does not have to be published by the certificate holder. However, the certificate holder is obliged to refer to the valid areas of application in a suitable manner when passing on the certificate.

For assembled products, the scope of application of the material or component with the most extensive restrictions corresponds to the scope of application of the entire product.
